Market your brand with Aluminum

Montebello aluminum tubes provide an airtight barrier for your product, while completely eliminating air transfer and "suck back" effect. Durable yet lightweight, aluminum provides ideal packaging for creams, gels, lip glosses, ointments, food paste and other semi solid products.

Need to keep your products fresher, longer?

Internal coatings are used to insure product compatibility and maximum shelf life. Versatile, cost effective epoxy-phenolic liners are ideal for a broad range of products depending on pH levels and product characteristics.

Have a unique product ... from the outside as much as from the inside!

At Montebello, we think that the package is the last word to convince your consumers; that is why we offer a wide selection of neck and dispensing options. The neck orifice may be closed, open, or custom made to your specifications. Break-off tips are available for one-time-use products or for sampling programs. We offer ophthalmic and nasal tips for special application. We also believe in security; Montebello offers unique, tamper-evident necks, child resistant closures and dispensing tips.

Montebello provides numerous product application options:

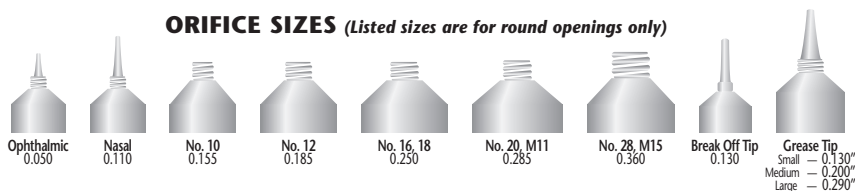

- Internal coatings and liners
- Crimp sealants
- Tamper resistant features and options
- Cap resins
- Cap choices and custom design
- Product delivery options
